Civit, M. N. Bufí i P. Valverde (2004) *Guia per a l' anotació de les funcions sintàctiques de CAT3LB: un corpus del català amb anotació sintàctica, semàntica i pragmàtica. Report Intern*

WARNING! discontinuity in functions (**n/c** suffixes at the end of the tags) is not mentioned in the guidelines. **n** suffix stands for the head (the finite (.Fn) or non-finite (.NFn) clause) receiving the complement; while **c** suffix stands for the complement (the dislocated function of a finite (.Fc) or non-finite (.NFc) clause).

.NFn: means that the constituent is a non-finite clause, one of whose complements is dislocated

.Fn: means that the constituent is a finite clause, one of whose complements is dislocated

.NFc: means that this complement is dislocated from its non-finite clause

.Fc: means that this complement is dislocated from its finite clause
